Pacific Island Countries				
	TITLE	DATE	AVAILABILITY	NOTES
COK-2010-02	"Cook Islands National Action Plan for Disaster Risk Management 2009-2015" August 2010	2010		Mentions: A new sewerage code has recently been introduced...Disaster Risk Reduction assessment criteria do not form part of existing development planning processes (i.e. EIA, Building Code, etc.). Incorporate DRM measures in all regulations addressing development planning processes (EIA, Building Code, etc.). Review of regulations and gaps in planning processes, including capacity of Government to enforce regulations, making recommendations to CIIC. Conduct appropriate awareness programmes for developers including property and infrastructure developers on DRM requirements of the regulations.
COK-2010-03	"Energy (Amendment) Regulations 2010" 201004 (With Cook Islands Energy Regulations 2006)	2010		
COK-2011-01	"Planning to Build? How to apply for Development Approvals involving Wastewater Systems" 2011, Cooks Islands Sewage & Sanitation Board	2011		
COK-2011-02	"Cook Islands Second National Communication under the UNFCCC" National Environment Service of the Government of the Cook Islands December 2011	2011		Enforce the guidelines and building codes for the construction and operation of residential, tourism and industrial structures in the coastal area that incorporate climate change projections as to sea level rise, storm surge and cyclones. Establish guidelines and standards for the construction (i.e. building codes) and operation of residential, tourism and industrial structures in the coastal area that incorporate climate change projections (e.g. sea level rise). Land use planning, location of new buildings and building codes should incorporate design, construction and building technologies related to climate change, extreme events and future conditions, and develop inspection guidelines and regulatory enforcement systems with appropriate capacity building and training in implementation, to support preventative planning at the development stage. Its role as the building standards controller provides the opportunity for the Ministry to update the national building code informed by its experiences in the recovery process in Aitutaki in Cyclone Pat's destructive wake in February 2010.
COK-2012-01	"Joint National Action Plan for Disaster Risk Management and Climate Change Adaptation (JNAP) 2011-2015" January 2012	2012		Mentions building code and sewerage code.
COK-2013-01	"The Cooks Islands Legislation A finding List as at July 2013", Faculty of Law Victoria University of Wellington	2013		
COK-2013-02	"Sanitation in the Cook Islands Three Year Plan 2013-2016" Government of the Cook Islands, Ministry of Infrastructure and Planning, Water, Waste & Sanitation Unit. v.0.7 5/12/13	2013		PublicHealth(Sewage) Regulations and Public Health Sewage (Code) Regulations (both 2008). Currently there are three Inspectors within the Public Health division of MoH who are registered under the Public Health Sewage (Code) Regulations 2008 to carry out functions relating to sanitation system approval and certification.

Pacific Island Countries				
	TITLE	DATE	AVAILABILITY	NOTES
COK-2013-01	"National Building Code Review for Cook Islands - scoping mission" March 2013	2013	<i>Request from Gov</i>	
COK-2014-01	"Public Health (Sewage and Wastewater Treatment and Disposal) Regulations 2014" Ministry of Health	2014		
COK-2015-01	"RFP for Procurement of Services for the Review of National Building Code, Building Control and Standard Regulation for the Cook Islands, RFP Reference No 141544" July 2015, Ministry of Infrastructure Cook Islands	2015		
COK-2015-02	"2015 Cook Islands National Infrastructure Investment Plan" Government of Cook Islands and PRIF	2015		Public Health (Sewage) Regulations 2008, and Public Health Sewage Code 2008. The latter sets out the minimum standards for domestic and commercial sanitation systems. Review of building code and transport systems to address disability access. schools: application of climate-proofed design and building materials in line with construction and material selection codes (the development of which are part of enabling environment activities). The elevation of school buildings should also take into account projected heights of storm surges for 2050 to assure that the buildings could function as shelters in case of natural hazards events. Individual projects should follow building and material codes that have included climate-proofing provisions. Raising building platforms above the reach of projected sea level rises and associated storm surges will be in particular important on the low lying atolls of the outer islands. Amend building and material codes to include climate proofing provisions.
COK-2016-01	"JNAP II - Are We REsiliEnt? The Cook Islands 2nd Joint National Action Plan - A Sectoral Approach to Climate Change and Disaster Risk Management 2016-2020" Cook Islands Government 2015	2016		Mentions: enforcement of the code requires strengthening. Review and assess the building code and the status of public and essential services buildings and infrastructure in the context of climate variability as disaster risk. Higher percentage of public and essential services buildings and infrastructure complying with building code.
COK-2017-01	BECA "Cook Islands Building Code - Inception Report" prepared for Ministry of Infrastructure, 28 April 2017	2017	<i>Request from Gov</i>	
COK-2017-02	"Final Consultation paper, New Building Related Laws for Cook Islands, Specific Features proposed for the New Building Act" 2017	2017	<i>Request from Gov</i>	
COK-2017-03	BECA "Cooks Islands Building Code Review, Updates & Amendments - 18th September 2017", PowerPoint	2017	<i>Request from Gov</i>	
COK-2017-04	"Cook Islands Building Code Review Consultation" 15 March 2017, Government of Cook Islands	2017	<i>Request from Gov</i>	
COK-2017-05	"Notes from Workshop at Mitiaro on the Building Code Review" 19 June 2017	2017	<i>Request from Gov</i>

	TITLE	DATE	AVAILABILITY	NOTES
COK-2021-07	"Cook Islands Utilities Regulation Policy 2021: Electricity, Water & Sewerage Services - Consultation Draft February 2021" Government of the Cook Islands	2021		Regulations, standards, codes, qualifications, etc. currently in force under the Energy Act 1998 will continue in effect under the new framework. The Government proposes that the Competition and Regulatory Authority should have responsibility for: developing (or adopting or approving) codes of practice for electrical or water or sewerage works; taking appropriate enforcement action in respect of cases of non-compliance with applicable standards or codes. Government is not proposing to change the Cook Islands Building Code 2019 or related arrangements, beyond giving the Competition and Regulatory Authority the ability to reference the Code, should that be required, in licence conditions for utilities providing water & sewerage services. Any regulations, and any electrical code of practice made under the Energy Act 1998 will continue in force under the new Utilities Regulation Act, until those regulations or that code are superseded.

FJI-2014-03	"Energy Labelling and Minimum Energy Performance Standards for Appliances and Lighting in Fiji - Expanding the Coverage of the Program to Additional Products" November 2014, SPC, George Wilkenfield and Associates	2014		Fiji is inserting new energy efficiency provision into the Fiji National Building Code. A review of priorities and options (NBI 2014) recommended that MEPS be implemented for a number of products commonly used in new construction, citing the AS/NZS standards. From the point of view of capturing the energy efficiency potential of new buildings, the report considered the highest priorities for MEPS were: 1. Air Conditioners, using AS/NZS 3823.2-2011; 2. Chillers, using AS/NZS 4776; 3. Close-control air conditioners, using AS/NZS 4965-2008, provided these have significant use in Fiji. As these are generally used in computer rooms and server warehouses, this may not be the case.

	TITLE	DATE	AVAILABILITY	NOTES
FJI-2022-01	"Fiji National Climate Finance Strategy" 2022 Government of the Republic of Fiji	2022		Enhance knowledge about and implementation of building codes throughout Fiji, including for the private sector and rural and outer islands. Climate Finance Priorities: Construct cyclone-resilient infrastructure that complies with disaster regulations, the national building code, and renewable energy targets ensuring compliance. Top Priority: Development of prioritization guidelines to plan asset maintenance and facility upgrades. Second Priority: Ensure that every rural community and every rural school has at least one building resilient to a Category 4 cyclone. Third Priority: Review and update building standards for school and health buildings. GOAL THREE: IMPROVE ENERGY EFFICIENCY Second Priority: Update the energy codes used for ventilation, appliances, cooling, and lighting and enforce the application of these in both the public and the private sectors. "Assessment, Design and Construction of Low Energy/ Carbon Buildings" provides technical assistance to the Ministry of Infrastructure and Meteorological Services to develop guidelines for low-carbon building design and construction, an energy efficient building code, and a voluntary green building rating system.

MHL-2018-01	"Navigating our Energy Future: Marshall Islands Electricity Road Map December 2018, RMI Energy Office	2018		Include the integrity of roof structures in the revised Building Code, with a view to supporting PV installations, especially on larger roofs. Ensure building code focus on energy efficiency. That building envelopes are designed with energy efficiency in mind – either allowing for orientation and air flow so the building is cool without air conditioning, or with insulation and minimizing leakage and drafts when using air conditioning. That roof structures, particularly those of larger buildings, are suitable for mounting solar panels. The integrated design of right-sized HVAC cooling systems in larger buildings.

	TITLE	DATE	AVAILABILITY	NOTES
WSM-2006-01	"Planning and Development Guidelines for Housing" June 2006, Planning and Urban Management Agency	2006		
WSM-2006-02	"Samoa National Tropical Cyclone Plan 2006" Approved by the National Disaster Council under Part II Section 9 of the Disaster and Emergency Management Act 2006 on 2nd November 2006	2006		3.2 National Building Code: Cyclone-Resistant Buildings The National Building Code provides engineering and construction guidelines on how to build a cyclone-resistant building/house. This will ensure that the building/house can withstand certain wind strength preventing it from being damaged. The same code also provides recommended floor levels and locations for buildings/houses to be built within flood prone areas (flooding caused by storm surges and heavy rainfall during tropical cyclones) to prevent them from being inundated. The Ministry of Works, Transport and Infrastructure is responsible for the enforcement of the National Building Code. The Planning and Urban Management Agency assists MWTI in enforcing this code through the development consent process. It is therefore highly recommended to everyone to ensure that their building/house designs takes into account the recommended designs, locations and materials provided by the National Building Code.

PACIFIC REGIONAL				
	Title	Date		Notes
PACIFIC REGIONAL (REG)				
REG-1998-01	"Sanitation for Small Islands - Guidelines for Selection and Development" Derrick Depledge SOPAC Miscellaneous Report 250 September 1997	1998		
REG-1998-02	"Disaster Resistant Housing in Pacific Island Countries - A compendium of safe low cost housing practices in Pacific Island Countries" Luc Vrolijk for South Pacific Disaster Reduction Program and UNDP, March 1998	1998		
REG-2000-01	"Environmentally sound technologies for wastewater and stormwater management in small island developing states in the Pacific," SOPAC Technical Report 321, SOPAC, Suva, Fiji, Burke, E. (2000)	2000		Many countries in the Region have neither regulations nor standards regarding the discharge of wastes into the environment. Building code standards for septic tank sizing and construction exist throughout the Region, but this do not guarantee an adequate discharge quality. Little attention is given to the disposal of septic tank effluent into the ground, which is a common source of groundwater pollution.
REG-2001-01	"National Building Codes Promotion and Application" Graham Shorten and Josefani Bola 2001 Building Safer Urban Communities in the South Pacific Regional Workshop	2001		
REG-2011-01	"Clean Communities - A Practical Guide to Building and Maintaining Toilets in the Pacific" Live & Learn Environmental Education 2011	2011		
REG-2014-01	"Hardship and Vulnerability in the Pacific Island Countries 2014" World Bank Group	2014		Mentions: Strengthening the ties and coordination between government bodies responsible for infrastructure provision and building codes and those responsible for disaster risk management and climate change adaptation
REG-2016-01	PRIF "Improving Accessibility in Transport - Infrastructure Projects in the Pacific Islands"	2016		https://www.theprif.org/document/regional/transport/improving-accessibility-transport-infrastructure-projects-pacific
REG-2016-02	"Sanitation Options for Pacific Island Countries - Fiji, Tonga, Solomon Islands and Kiribati, Summary Report" PRIF September 2016	2016	<i>Request PRIF</i>	Not officially published. Mentions "The sanitation options provided for in the Building Code of Tonga needs to be expanded. Design and approval guidelines for sanitation facilities for commercial, institutional, hotels and tourist resort premises need to also be included in an update for the Building Code.....Building Code: in a number of Pacific countries, this Code has tended not to be regularly updated and often does not represent or allow more recent building practices, uses of modern plumbing materials and appliances and innovative on-site sanitation facilities. As some newer sanitation options have better environmental outcomes and are often more economical to build and/or operate it is important that a Building Code be kept up to date to allow the use of these options."
