and climate goals

Example: Transforming Pacific Air Travel with Virgin Samoa Aviation

A public-private partnership driving growth, affordability, and strong governance

130% increase in available seats and 31–45% reduction in airfares

\$10 million fiscal benefits from increased economic activity

Government held 49% equity and provided policy oversight

Virgin Blue held 51% equity and managed airline operations

\$14.2 million private capital mobilized for operations

Clear governance, risk-sharing, and leadership delivering tangible benefits

Sustainable Partnerships in Infrastructure Investments

Actionable policy lessons for replicable public-private partnerships and collaborations

Use **KPIs** to measure investment impact, service quality, and fiscal benefits

Balance **strong government oversight** with private sector operational autonomy

Define roles clearly to avoid conflicts and enhance operational efficiency

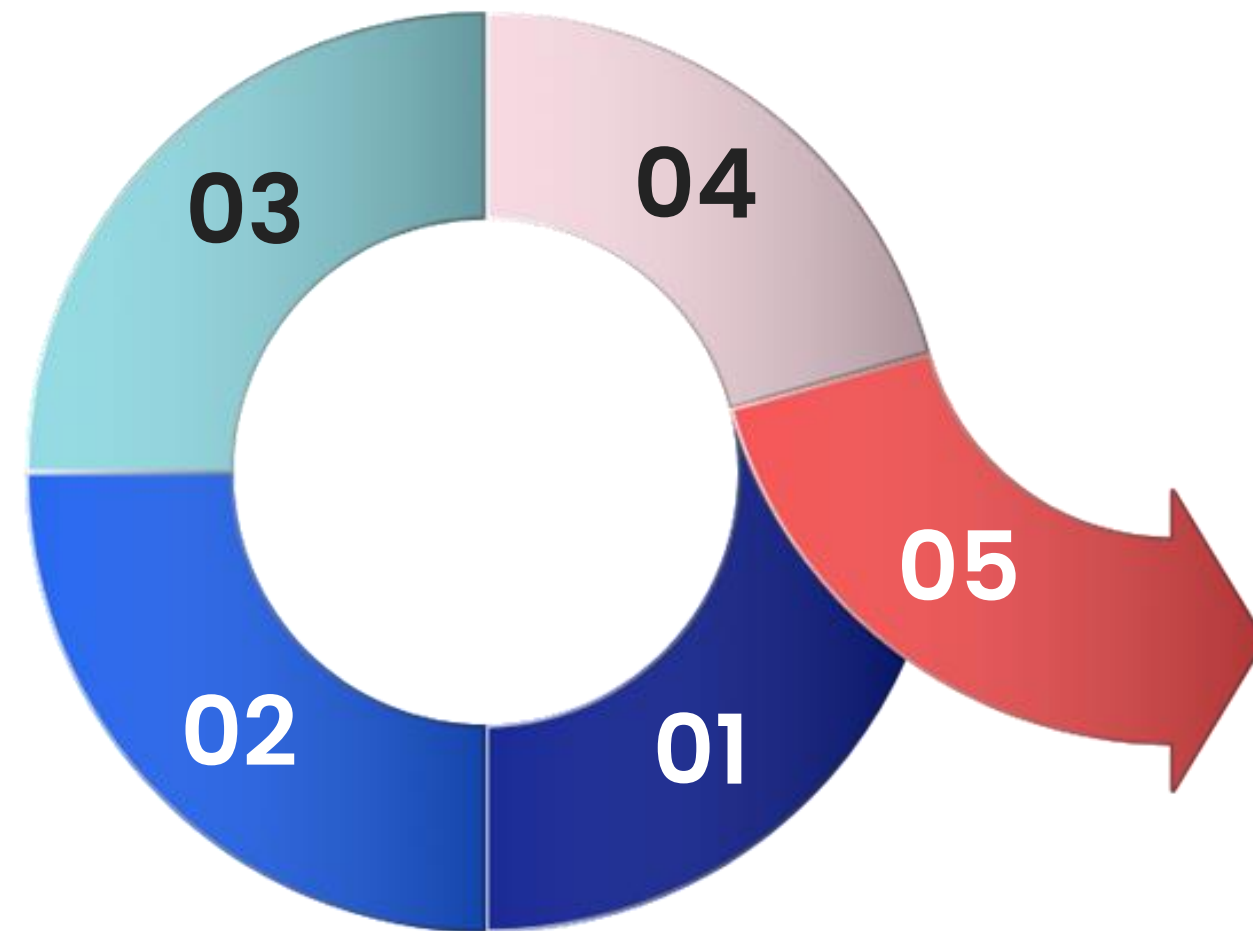

Allocate risks fairly to parties best equipped to manage them

Empower local teams to develop sustainable expertise and resilience

KVAConsult Accelerates Climate Finance in the Pacific

Driving strategic leadership and technical expertise for sustainable infrastructure
